Director,
ICAHD

ICAHD UK

The Israeli Committee Against House Demolitions
הוועד הישראלי נגד הריסת בתים
الحركة الإسرائيلية ضد هدم البيوت

Jeff Halper's new book, *War Against the People* argues that what is happening between the Israelis and Palestinians is but a microcosm of what is happening globally as the Global North closes itself into an archipelago of wealth and then seeks to exploit, control, marginalize and ultimately pacify those on the outside (whether in the "developing" countries or the domestic poor and dissident) - using an array of ever more sophisticated military, surveillance and police instruments, tactics and futuristic weapons to securitize the planet in order to preserve the hegemony of transnational capital.

Jeff Halper will sign copies of the book after the meeting.
